

**ABSTRACT OF THE DISCLOSURE**

A lockable storage case includes a top cover pivotably  
5 coupled to a bottom cover through a spine. The top  
cover includes loops or an upper lock receiving member  
and a lower lock receiving member defining a top cover  
lock insertion path. The bottom cover includes loops  
or an upper lock receiving member and a lower lock  
10 receiving member defining a bottom cover lock insertion  
path. The lower lock receiving members of both the top  
and bottom covers include hooks for receiving and  
maintaining a latch. When the top cover is closed on  
the bottom cover, the top and bottom cover insertion  
15 paths combine to form a combined lock insertion path.  
A lock for the storage case includes first and second  
catch mechanisms with first and second catches. To  
lock the storage case, the lock is inserted into the  
combined lock insertion path so that the catches on the  
20 lock mate with and are retained with the hooks in the  
top and bottom covers.
